PROFESSIONAL SUMMARY

Results-driven Software Engineer and AI Specialist with 2+ years of progressive experience architecting and delivering production-grade full-stack web applications, enterprise ERP systems, and secure RESTful APIs. Proven ability to lead end-to-end software delivery cycles from system design and database modeling to containerized deployment and CI/CD pipelines consistently shipping scalable, high-performance solutions that drive measurable business outcomes. Deep expertise across the modern stack (React, Next.js, Django, Node.js, PostgreSQL, Docker) with a strong focus on secure API design, government-grade cybersecurity protocols, and AI/ML integration. Passionate about building elegant digital products that solve real-world problems in high-velocity, FAANG-style engineering environments.

CORE COMPETENCIES

Programming Languages: Python, JavaScript, TypeScript, HTML/CSS

Frontend Development: React, Next.js, Tailwind CSS, Bootstrap, Framer Motion, Figma, Responsive Design

Backend Development: Django, Django REST Framework, Node.js, Express.js, RESTful APIs, Microservices Architecture

Database Management: PostgreSQL, MySQL, MongoDB, Supabase, Database Modeling, Query Optimization

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Swagger UI, AWS, CI/CD Pipelines

AI / Machine Learning: AI/ML Integration, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)

Cybersecurity: Secure Authentication, Government-grade Security Protocols, Vulnerability Assessment, Secure API Development

Software Engineering: OOP, Data Structures & Algorithms, System Design, Agile (Scrum/Kanban), TDD, Code Review

PROFESSIONAL EXPERIENCE

Fullstack ERP Systems Developer | Phoenixopia Solutions — Addis Ababa, Ethiopia

May 2026 – Present

- Architected and led development of a comprehensive enterprise ERP platform using React, Next.js, Django, and Node.js, enabling end-to-end management of complex business workflows and high-volume data transactions.

- Engineered containerized deployment workflows using Docker, reducing system downtime and increasing maintainability while adhering to stringent software architecture and security standards.
- Designed and optimized relational database schemas in PostgreSQL and MySQL, improving data integrity and query performance for mission-critical business operations.
- Implemented secure authentication and authorization systems applying government-grade security protocols, hardening the platform against common attack vectors.

Backend Developer & Project Manager | GeezGeeks Tech Solution — Remote

March 2025 – December 2025

- Led end-to-end technical delivery of a comprehensive Ecommerce API and Hotel Booking System, coordinating a remote engineering team to achieve successful product launches on schedule.
- Engineered secure, high-performance RESTful APIs using Django and MySQL, reducing data exchange latency and improving system interoperability across multiple client applications.
- Oversaw full containerization and orchestration using Docker and Kubernetes, reducing deployment times by 25% and enabling horizontal scaling to meet growing user demand.
- Managed distributed Git workflows, enforcing code quality standards through structured code reviews and branch protection policies across the full sprint lifecycle.

Frontend Developer Intern | INSA (Information Network Security Administration) —

Addis Ababa, Ethiopia

August 2024 – January 2025

- Designed and built minimal, responsive UIs for government-grade projects (E-commerce Website, Beauty House Management System) using React, TypeScript, and Bootstrap, boosting cross-device accessibility.
- Optimized frontend performance through lazy loading and render optimization strategies, contributing to a 20% increase in customer retention rates via improved user journeys.
- Collaborated with cross-functional security and backend teams to ensure UI components adhered to INSA's strict web security, data protection, and secure coding requirements.

SELECTED PROJECTS

Laundry Management System · React, Tailwind CSS, Django, Docker, PostgreSQL

- Engineered a full-stack multi-dashboard laundry management platform featuring user, rider, and partner dashboards, automating order tracking, rider assignment, logistics coordination, and financial management workflows.
- Designed a normalized PostgreSQL schema and Dockerized the full application stack, enabling scalable deployment and reliable multi-tenant data isolation.

SafeGround · *Next.js, TypeScript, Tailwind CSS, Framer Motion, AI, Supabase*

- Architected a full-stack, privacy-first digital well-being platform leveraging AI to support addiction recovery for Ethiopian youth, delivering an anonymous sanctuary that removes stigma-driven barriers to access.
- Integrated client-side AI relapse prevention tooling with Supabase as the real-time backend, achieving zero data exposure risk with low-latency responsiveness.

Ecommerce API · *Django REST Framework, MySQL, Swagger UI*

- Architected and delivered a production-grade e-commerce backend API handling 10,000+ daily transactions, featuring complete product management, order processing, and secure customer data workflows.
- Designed a normalized MySQL schema for high-throughput queries and integrated Swagger UI for automated API documentation, reducing developer onboarding time by 15%.
- Implemented JWT-based authentication and role-based access control, safeguarding customer and product data against unauthorized access.

Elegance Beauty (Appointment Management System) · *React, Tailwind CSS, Node.js, MySQL, Express.js*

- Built a full-featured appointment scheduling and management platform, reducing administrative overhead by 40% and decreasing manual scheduling errors by 25% through real-time booking and calendar synchronization.

Ethiopian University Student Collaboration Platform · *Figma (UI/UX Design)*

- Designed a collaborative learning and resource-sharing platform for Ethiopian university students in Figma, delivering high-fidelity wireframes optimized for academic collaboration and cross-institution project sharing.

Modern Fitness Website Landing Page · *React, Tailwind CSS, Framer Motion*

- Developed a modern, fully responsive fitness landing page with polished Framer Motion animations, delivering a conversion-optimized user experience across all device sizes.

CERTIFICATIONS

ALX Backend Development Certificate | *ALX Africa* | *Issued: July 11, 2025*

Completed an intensive 8-month program achieving advanced proficiency in scalable backend architectures, RESTful API design, and containerized deployment using Python, Django, Flask, MySQL, and Docker.

ALX Professional Foundations Certificate | *ALX Africa* | *Issued: March 7, 2025*

Completed intensive project-based career readiness program developing deep competencies in leadership, entrepreneurial thinking, digital productivity, and agile collaboration in a remote environment.

INSA 3rd Cyber Talent Graduation Certificate (Development Track) | INSA | Issued: January 2025

Earned certificate from Ethiopia's Information Network Security Administration for the 3rd Summer Cyber Talent Bootcamp — full-stack development, advanced API design, OOP design patterns, web security, and secure coding standards.

Data Analytics Certificate | Udacity | Issued: August 28, 2025

Gained proficiency in descriptive statistics, data wrangling, structured business metrics analysis, and data visualization for data-driven decision-making.

Programming Fundamentals Certificate | Udacity | Issued: August 16, 2024

Completed project-driven software engineering foundations covering HTML, CSS, JavaScript, Git, algorithmic problem-solving, and industry-standard debugging practices.

EDUCATION

Bachelor of Science in Software Engineering

Expected: 2028

Adama Science and Technology University (ASTU) — Adama, Ethiopia

- President, ASTU Entrepreneurship and Innovation Club — Led student innovation initiatives, organized workshops and pitch events engaging 100+ participants, fostering an entrepreneurial culture across campus.
- Member, CSECASTU Coding Club — Participated in competitive coding challenges and collaborative technical problem-solving sessions.
- Currently founding a tech startup, applying academic knowledge and engineering expertise to address real-world business challenges.
